Modular graphic designs
Modularité des graphismes
Modularität der Muster
Modularidad de los gráficos

È possibile ottenere effetti di continuità grafica, accostando il soggetto sempre nella stessa direzione. Eventuali imperfezioni sono il frutto di lavorazioni che mirano a restituire il sapore artigianale.

Continuous patterning effects can be achieved by placing the motif so that it always runs in the same direction. Any flaws are the result of processes intended to create a hand-crafted impression.

On peut obtenir des effets de continuité graphique en mettant le sujet côte à côte toujours dans le même sens. Les imperfections sont le fruit de façonnages destinés à rendre l'esprit artisanal.

Die Wirkung von grafischer Kontinuität lässt sich erzielen, indem man das Thema stets in die gleiche Richtung ausrichtet. Eventuelle Unvollkommenheiten sind das Ergebnis von Bearbeitungsverfahren, die das kunsthandwerkliche Flair verleihen sollen.

Se pueden lograr efectos de continuidad gráfica, combinando el tema siempre en la misma dirección. Eventuales imperfecciones son fruto de elaboraciones que pretenden transmitir un sabor artesanal.

Proprio per la caratteristica di grande durezza e intaccabilità da parte degli agenti esterni, 20MM può essere pulito con la quasi totalità dei detergenti.

Si consiglia comunque di utilizzare semplicemente un detergente neutro e un getto d'acqua.

Per una maggiore comodità e per evitare che nell'asciugatura si creino depositi di calcare consigliamo di facilitare il drenaggio con una spazzola in gomma.

Thanks to its great hardness and weather-resistance, 20MM can be cleaned with almost any detergent.

However, we recommend simply using a mild detergent and a water jet.

For greater convenience and to avoid limescale deposits forming, we recommend facilitating drainage with a rubber brush.

En raison de sa grande dureté et résistance aux agents externes, 20MM peut être nettoyé avec presque tous les détergents.

Il est conseillé dans tous les cas de n'utiliser qu'un détergent neutre et un jet d'eau.

Pour plus de facilité et pour éviter qu'au moment du séchage ne se forment des dépôts de calcaire, nous conseillons de faciliter le drainage au moyen d'une brosse en caoutchouc.

Gerade wegen seiner enormen Härte und Angreifbarkeit seitens der äußeren Einflüsse, kann 20MM mit fast jedem Reinigungsmittel gereinigt werden.

Es wird jedoch empfohlen einfach ein neutrales Reinigungsmittel und einen Wasserstrahl zu verwenden.

Aus Bequemlichkeit und um zu vermeiden, dass sich beim Trocknen Kalkablagerungen bilden, empfehlen wir die Drainage mit einer Plastikbürste zu erleichtern.

Por sus características de gran dureza y resistencia a los ataques de agentes externos, 20MM puede ser limpiado con la casi totalidad de los detergentes.

De igual modo, se aconseja utilizar simplemente un detergente neutro y un chorro de agua.

Para mayor comodidad y para evitar que durante el secado se formen depósitos de cal, aconsejamos facilitar el drenaje con un cepillo de goma.
