simplicity
is the ultimate
sophistication
leonardo da vinci

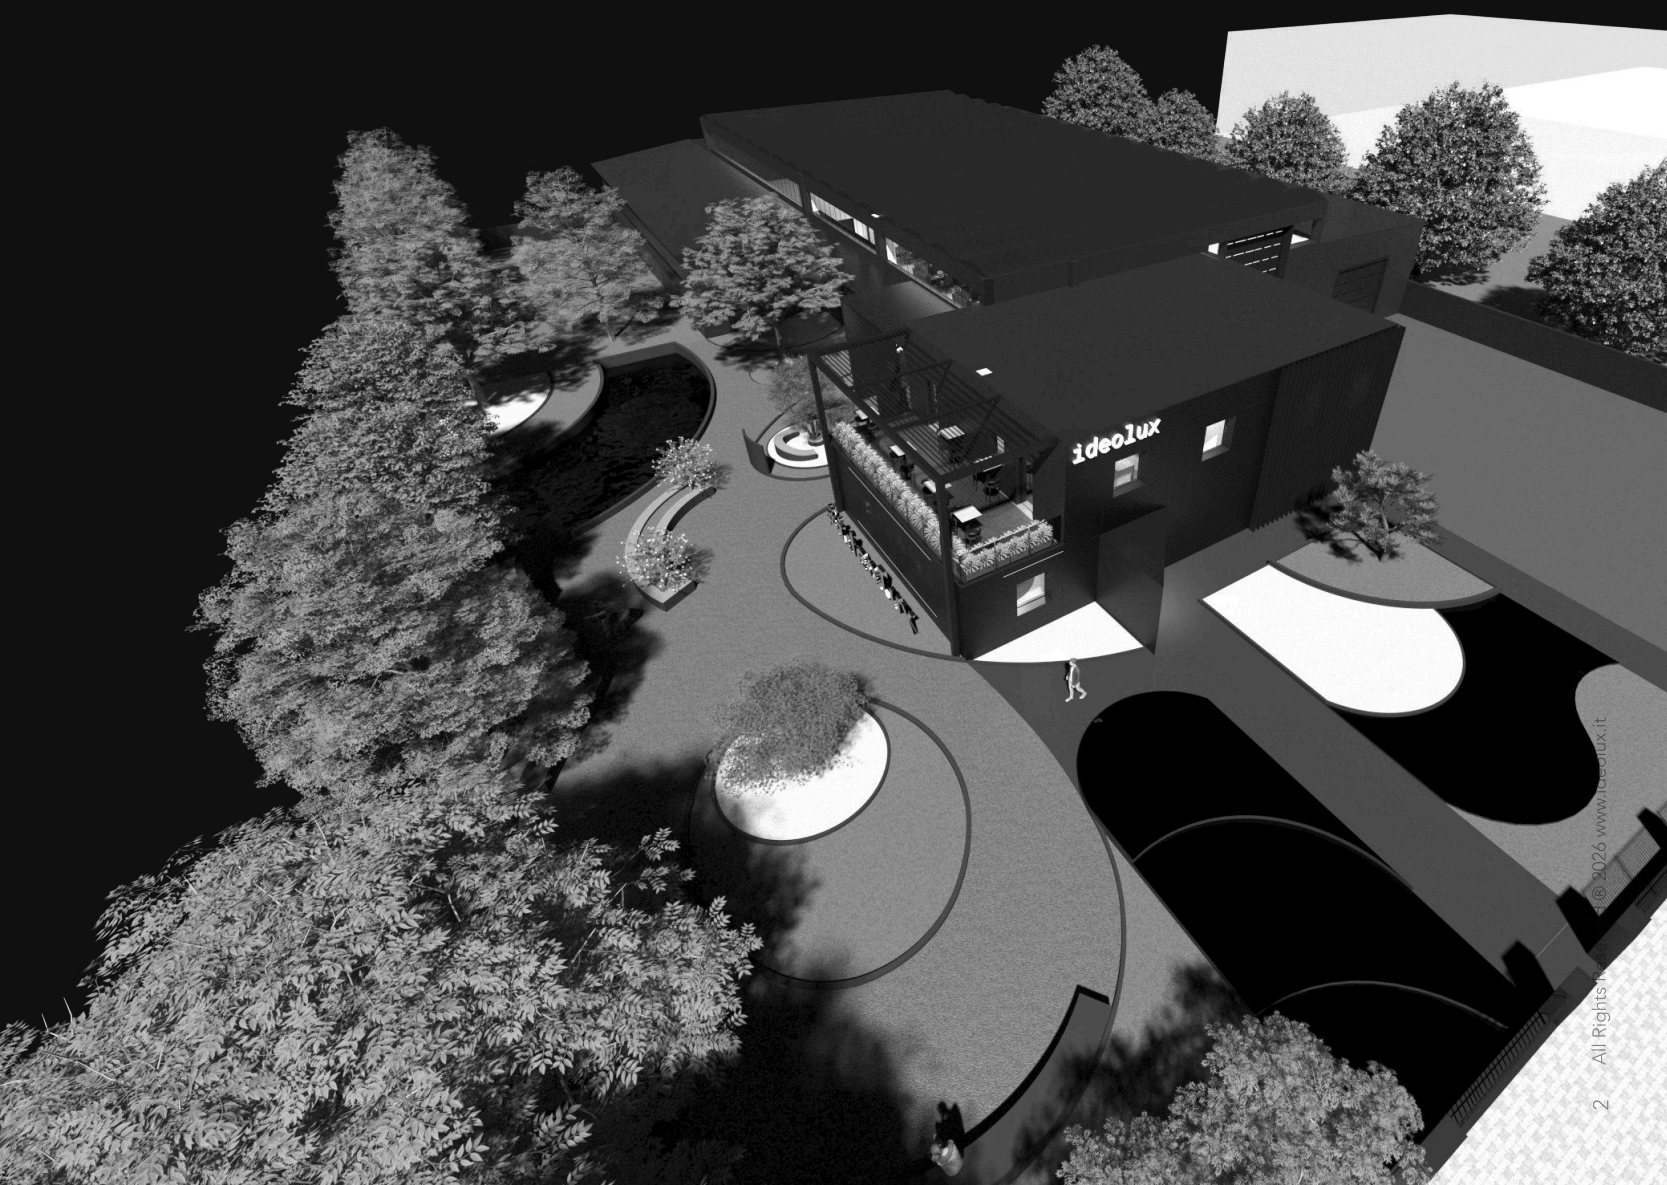

company

ideolux designs, engineers and produces high-quality LED Lighting. Our project-grade products, systems and services comply with international quality & safety requirements

ideolux's mission is to streamline supply chain while elevating quality standards. We continuously innovate using cutting edge technology and regularly launch novel solutions thanks to a solid LED know-how and dedicated R&D

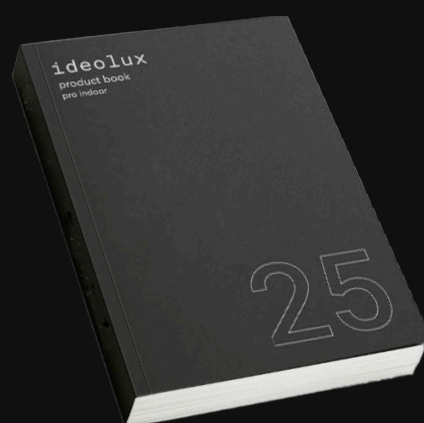

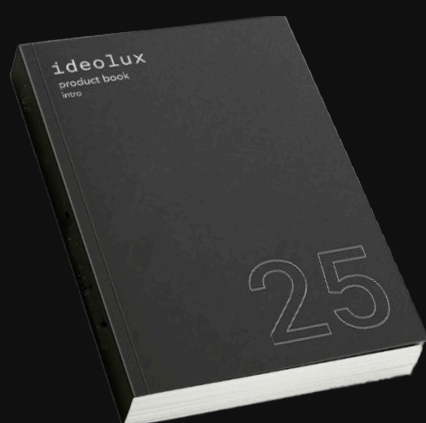

ideolux's extensive indoor and outdoor product book covers complete projects. At the same time, our flexible and highly skilled technical support team provides clients with professional services such as lighting design, product customization, bespoke product design, test reports, certification, and much more

rooted in Italy, Ideolux has strategically expanded to the UAE with a regional office and warehouse. Today, Ideolux offers localized marketing and technical support to its professional customers and consumers in the Middle East

26 product book collection

for a comprehensive view of our products, please explore our other product book series. These books provide detailed information and showcase the full collection, offering a wide variety of solutions to suit various needs and preferences

intro

our intro offers a general overview showing a dedication to innovation quality and excellence. It highlights our expertise in crafting tailored solutions, from luxury interiors to large scale outdoors, proving our commitment to precision, creativity and positive impact

lux indoor

lux indoor series combines exceptional performance and sophistication, making it the ideal choice for high-end unique environments. This series is designed to deliver unparalleled brilliance and efficiency, creating an atmosphere of unrivalled elegance

pro indoor

pro indoor series is designed for professional projects, offering innovative minimal designs, cutting-edge specifications, and full customization options. Combining beauty in design and efficiency, these products create refined indoor spaces

coming soon
lux outdoor

lux outdoor series combines sophistication and meticulous craftsmanship. This series is ideal for public realm, luxury landscapes and facades. it highlights design elements with brilliance and efficiency, transforming outdoor spaces into exquisite environments

pro outdoor

pro outdoor series features innovative, minimalistic designs with cutting-edge specifications, and full customization. Ideal for outdoor spaces, these products enhance architectural elements with exceptional performance and versatility

technical
indoor & outdoor

technical indoor & outdoor series offers robust designs and cutting-edge technical specifications. With long lasting indoor illumination and weather resistant outdoor performance, this series suits professional projects requiring versatility and quality lighting

ideolux

new ideolux factory

introducing the new expansion on our factory that is scheduled to be open for visitors during the first quarter of 2025. Besides the implementation of new production processes, this new expansion is set to provide an improved experience center for our visitors along with a significant expansion of our laboratories, storages facilities as well as improve the well-being of our workers and employees working at our current facility

global presence

rooted in Italy, Ideolux has strategically expanded to the UAE with a regional office and warehouse. Today, Ideolux offers localized marketing and technical support to its professional customers and consumers in the Middle East

i

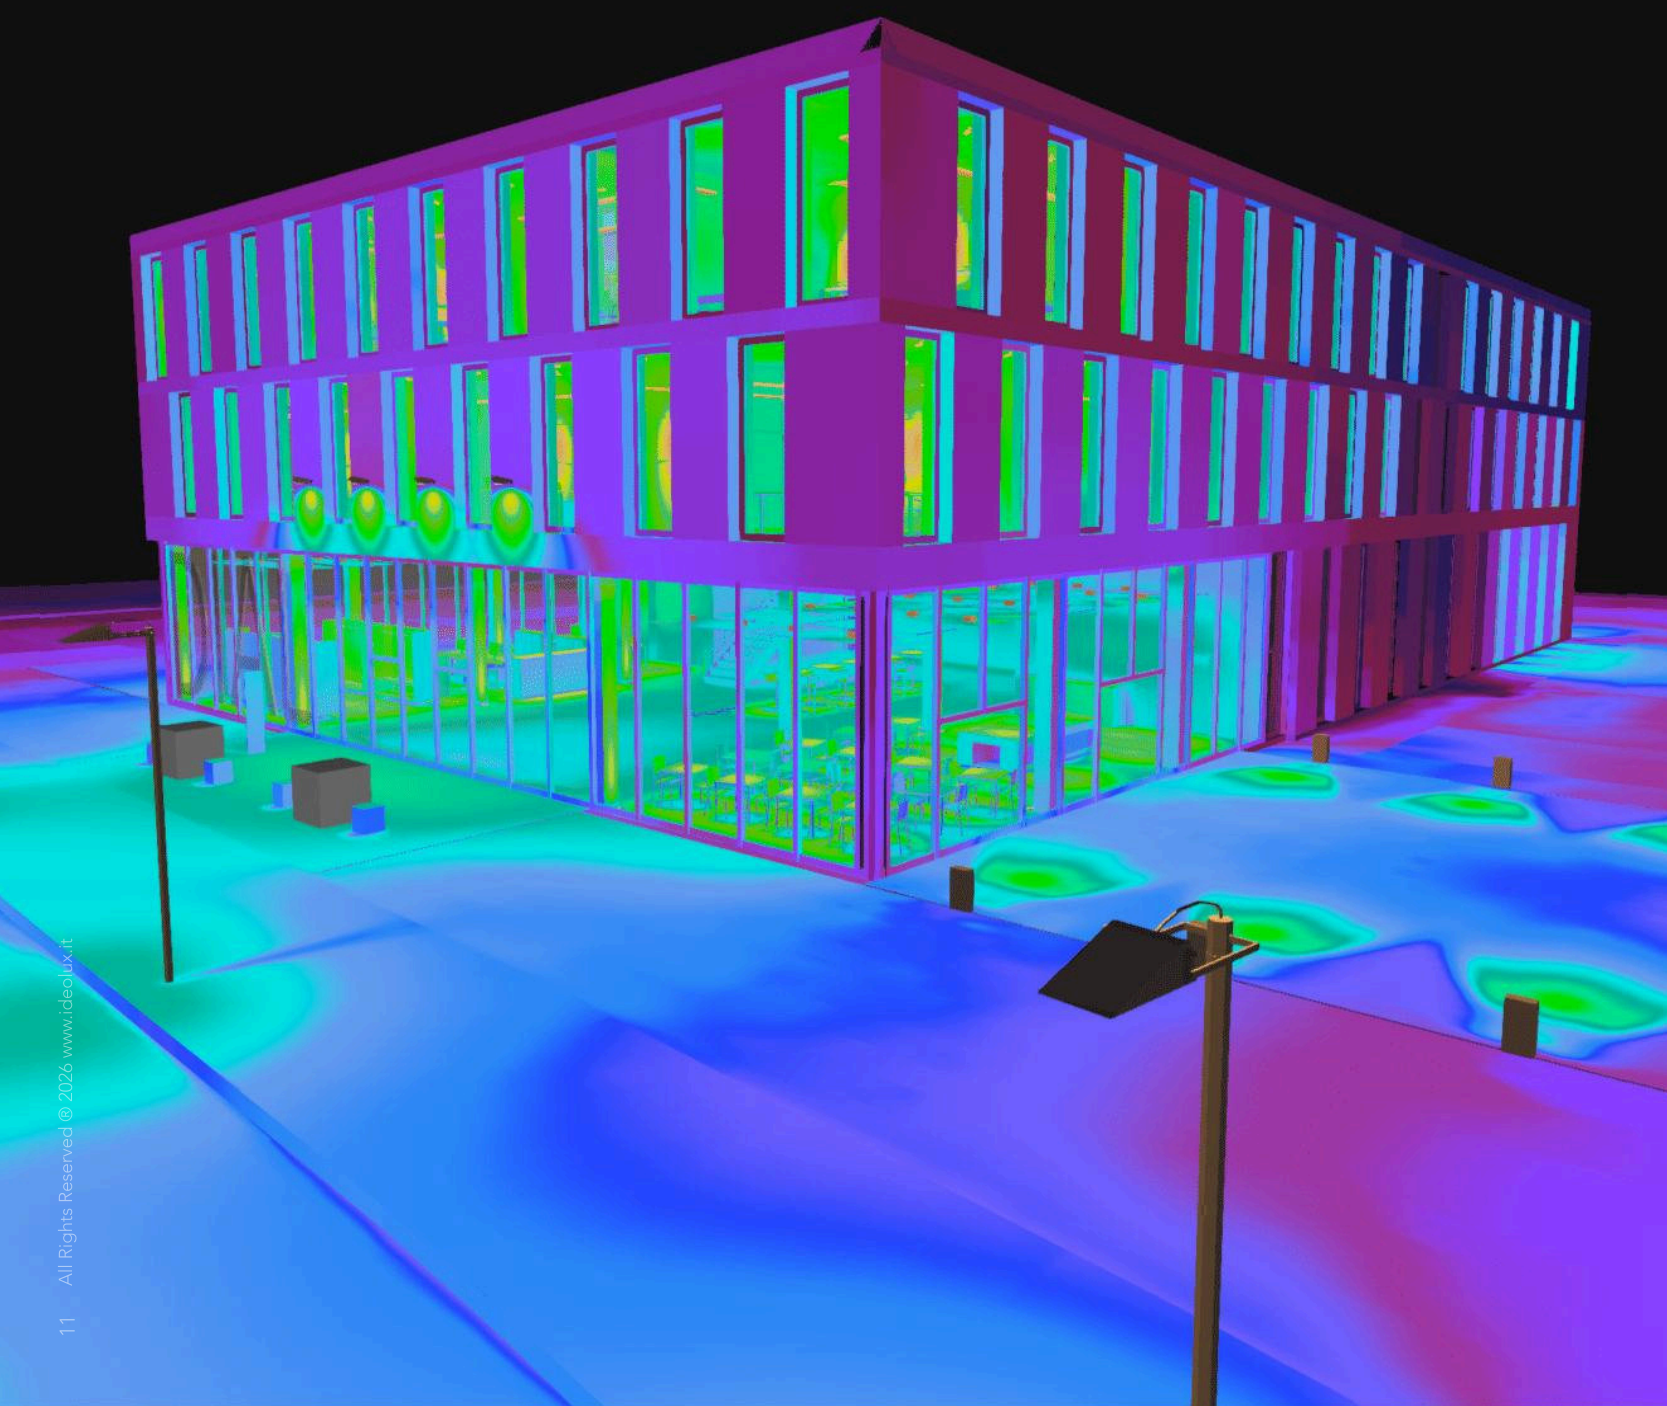

global presence

- headquarter
- rep office
- support office

- indirect sales

design consulting

at ideolux we have vested interest to achieve beautiful, efficient and long lasting results when it come to lighting schemes, reason why we always start for lighting consulting and design

our design support team's mission is to accompany architects, consultants and lighting designers on their projects. it offers multiple specialized services such as animations, rendered perspectives, lighting simulations, lighting layouts, schedules, etc.

bespoke lighting

born out of our mission to offer optimized complete solutions, we go the extra mile and realize those intricate custom solutions that our clients need to complete their project whether it's outdoor or indoor

certifications

ideolux s.r.l. is certified by TUV in compliance with ISO 9001:2015 for design, manufacture & marketing of lighting products

ERP ensures proper recycling and disposal of electronic waste and batteries in Europe. It helps manufacturers meet legal recycling obligations, promoting environmental sustainability and resource efficiency

CE is certificate of conformity with European health, safety, and environmental protection standards

RoHS, Restriction of Hazardous Substances, restricts the use of specific hazardous materials found in electrical products

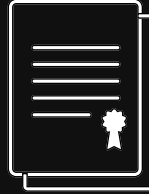

ENEC is the high quality European Mark for electrical products that demonstrates compliance with European standards EN

IECEE CB Scheme is an international system for test reports and certificates dealing with the safety of electrical products

DarkSky is the recognized global authority on light pollution, leading an international movement to protect the night sky

ideolux offers a range of tests upon request. Below is a list of available test reports. Some are readily accessible, while others may require additional charges

The U.S. Green Building Council (USGBC), founded in 1993, is a private 5013, membership-based non-profit organization that promotes sustainability in building design, construction, and operation

SASO certificate is required by KSA to ascertain that goods have been successfully tested to meet the safety and quality standards of the country

IK testing

committed to ensuring our LED lighting products are robust, durable, and capable of withstanding the harshest conditions, we are prioritizing comprehensive IK testing for impact resistance

our testing team collaborates closely with architects, consultants, and lighting designers to ensure every project meets durability standards. We provide services like detailed impact resistance analysis, simulation tests, and certification to guarantee optimal performance and longevity of our lighting solutions

IP testing

ensuring the longevity of our products is top priority at ideolux and we emphasize comprehensive testing to guarantee protection against water and dust, making sure our products perform its best in various environments

product families

ideolux's extensive product book is organized into five large families of products. Each of these families is designed to address a specific trench of the lighting market and offer particular solutions for its respective clients

lux

lux range that embodies elegance and durability, offering exceptional performance and style

product families

ideolux's extensive product book is organized into five large families of products. Each of these families is designed to address a specific trench of the lighting market and offer particular solutions for its respective clients

pro

professional range with a focus on innovative minimal design, cutting edge specification and fully customizable systems

eco

economical range with high energy efficiency
and long lifetime intended for trade and
general application projects

quo

project-grade range with high reliability,
flexibility & focus on color quality,
performance optics and ability to customize

spc

special projects range that require fully
bespoke products designed on demand with
a focus on design, material and finishes

product code

ideolux product code is not only designed to give a detailed indication of the correlated product but also allows our clients to compose the product code and order any of our standard products hassle-free

ugr rating

ideolux products offer optimal visual comfort with UGR ratings as low as 16, minimizing glare and enhancing the overall lighting experience

high efficacy

ideolux LED products boast high efficacy, with some models delivering up to 180 lm/W for exceptional energy efficiency and performance

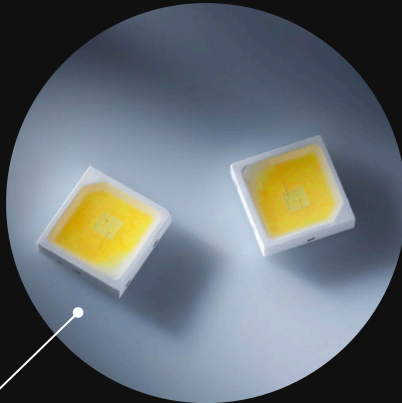

backlight, uplight, glare

our LED products feature excellent BUG ratings, ensuring effective control over backlight, uplight, and glare. This makes them ideal for a wide range of applications while minimizing unwanted light spill

color rendering index

our products offer exceptional color accuracy, with CRI ratings that can reach up to 98, ensuring vibrant and true-to-life illumination

light source

SMDs are widely used in modern lighting applications due to their compact design and ability to emit bright light while consuming less power. These LEDs are mounted directly on circuit boards for efficient heat dissipation, they are commonly found in panel lights, strip lights, and ceiling lights

light source

COBs offer superior brightness and efficiency by integrating multiple LED chips onto a single board, resulting in a powerful and uniform beam. Ideal for applications needing intense, concentrated lighting, such as downlights, floodlights, and spotlights

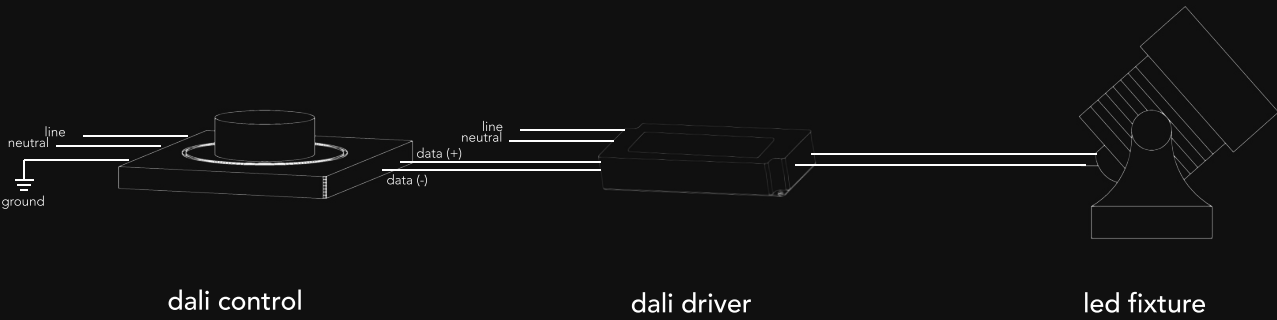

controls

our lighting solutions come equipped with a variety of advanced control functions designed to enhance convenience and efficiency. Whether it's dimming, color temperature adjustment, motion sensing, or remote control capabilities, our systems are tailored to meet the diverse needs of our clients

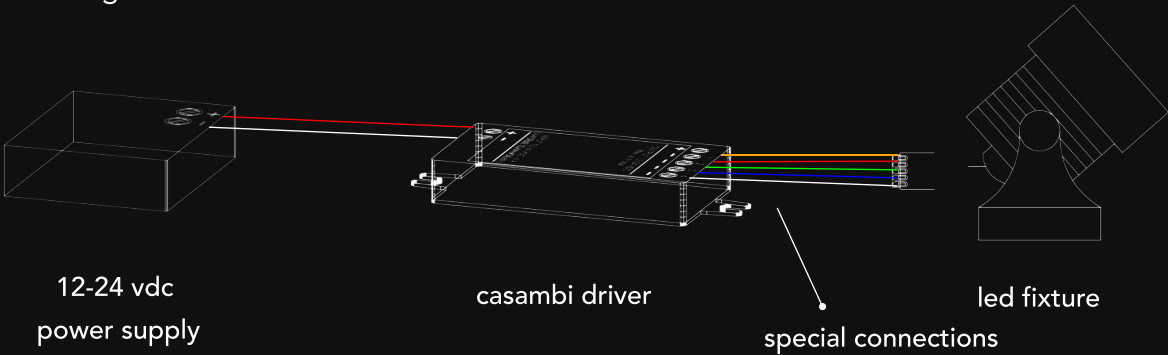

dali wiring configuration

dali dimming offers precise control over led lighting, enabling smooth brightness adjustments, scene settings, and group control. Ideal for various applications, it ensures energy efficiency and professional-grade lighting tailored to any environment

casambi wiring configuration

casambi enables advanced led lighting control with bluetooth wireless technology, allowing easy customization, scene settings, and group control via mobile devices. Ideal for various applications, it offers flexibility, scalability, and energy efficiency without complex wiring

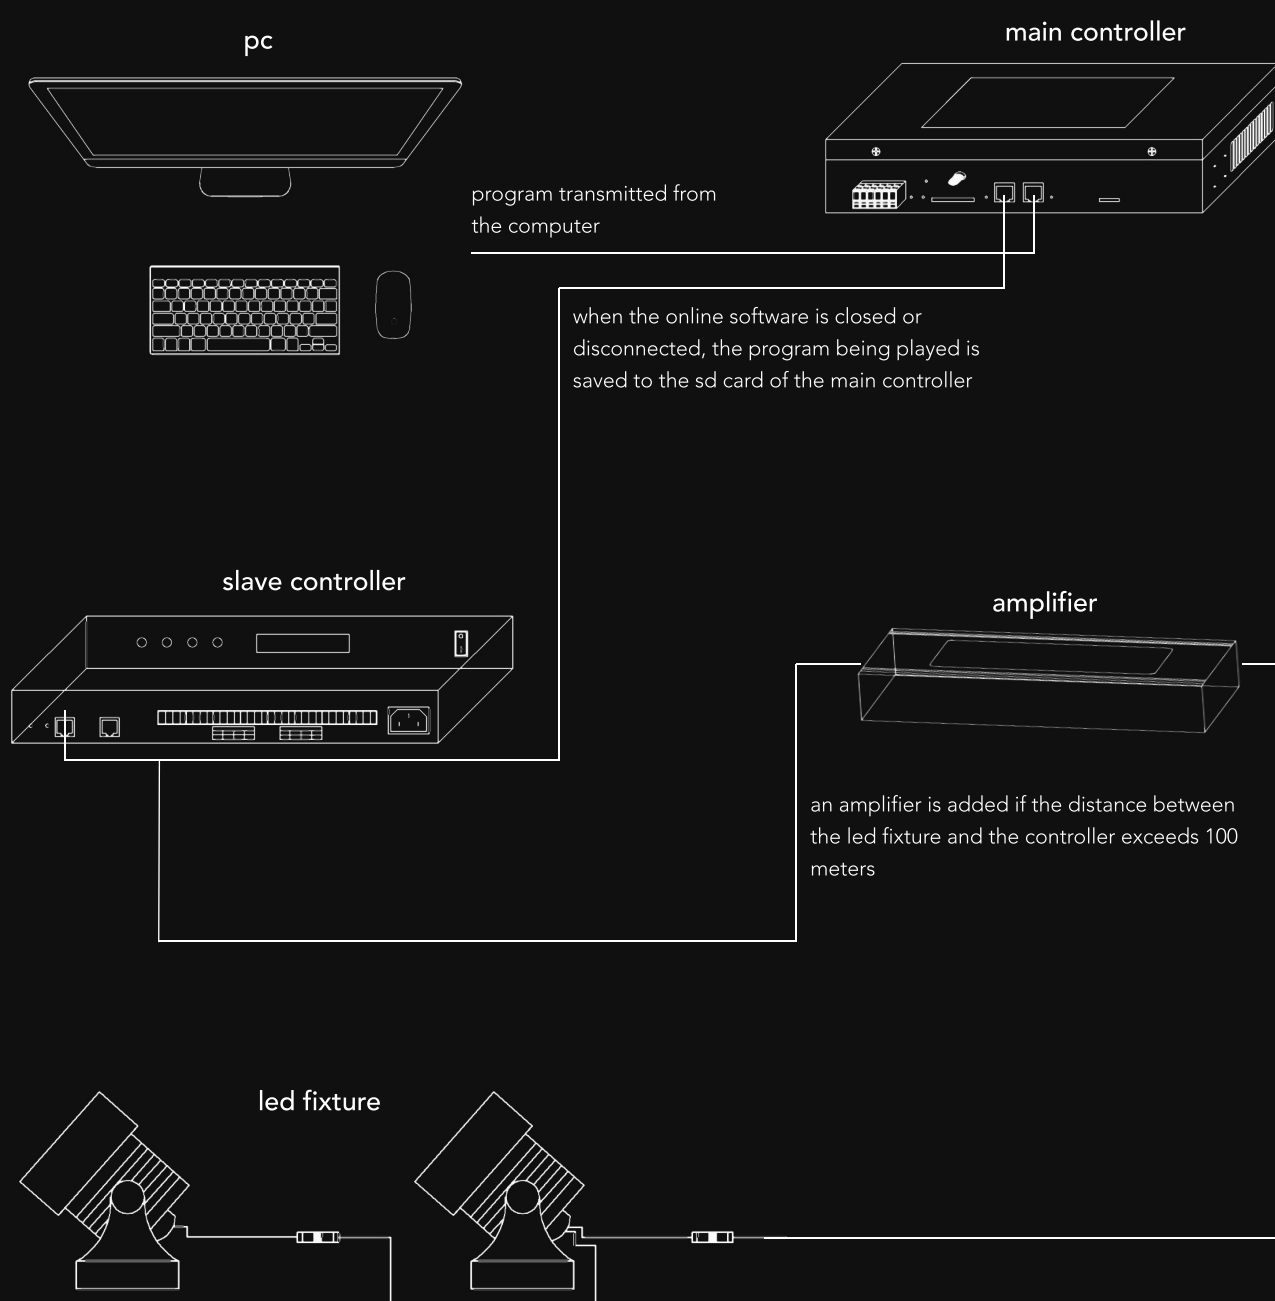

RGBW	Tunable White
+: common (+)	+: common (+)

2: green (-)	2: cool (-)
3: blue (-)	3: not in use
4: white (-)	4: not in use

*for information on additional control options, please contact ideolux's sales team

dmx/spi wiring configuration

dmx and spi connection offers precise control over led lighting, enabling smooth transitions, dynamic effects, and synchronized patterns. Ideal for architectural and decorative applications, they provide scalable, professional-grade lighting solutions with enhanced visual impact

A wide-angle photograph of the interior of Mr Toad's Pub & Kitchen. The space is characterized by its high ceiling with ornate, teal-colored decorative panels and large, cascading chandeliers made of many small, warm-toned lights. The floor is covered in a black and white geometric pattern. In the foreground, there are several round, light-colored tables with white chairs that have orange seats. In the background, there are more tables and chairs, a large window looking out onto a city street, and a red velvet sofa. The overall atmosphere is modern and sophisticated.
